

Quaker Bolivia Link

*A Quaker Response to
Poverty*

QBL works with the indigenous people living on the Altiplano at 12,500 feet and higher.

Pasture is poor and milk yields are low. Livestock is thin and vulnerable to disease.

Animal Breeding Programs

Quaker Bolivia Link has funded 15 animal breeding and pasture improvement programs.

In the last 12 years we have set up village projects for poultry, cattle, and even guinea pigs, the traditional major source of protein for Andean people.

In one community we have provided pasture improvement, with each family receiving a pedigree holstein cow. The first calf from each cow is given to a family in a neighboring village. We're not only providing an improved diet, but also bringing families a source of income.

All this has been made possible by the generosity of our supporters in the US, Ireland and the UK.
